GROUPE ICV
L'art & l'expertise du vin

# 5 fields of expertise to provide support...

## CONSULTANCY

### • Vineyard

**Because efficient winemaking requires quality grapes.**

Single vineyard selections, advice for managing inputs, fruit tasting, technical monitoring of vineyards, precision viticulture (Oenoview®), irrigation (i-pilote®)...

### • Packaging

**To ensure the preservation of wine.**

Advice and monitoring of the packaging processes, inspection of dry goods, assessments (bottles, screwcaps...), sensory analyses of bottled wines, dissolved $O_2$, metrology ...

### • Winemaking - Œnology

**To control your wines and innovate.**

Advice and monitoring of the production processes (winemaking and maturation), analysis control plan, blending, preparation of wines for packaging...

### • Quality and sustainability

**To improve your performance and help you commit to sustainability.**

Quality audits, tracking and food safety (HACCP...), corporate social responsibility assistance with CSR schemes, coordination of corporate strategies...

## ANALYSES

**To control and secure winemaking.**

Grape, must and wine analyses:
- routine analyses
- COFRAC analyses and relevant certificates (export, compliancy...)
- microbiological analyses (identification of bacterial spoilage...)
- specific analyses (OTA, biogenic amines, chromametry...)

Analyses on dry goods (corks, bottles...)

Assistance with the efficiency of your own laboratory.

# PROFESSIONAL TRAINING

## Get a head start in your marketplace.

Trainings for every need!

Find over 50 themes, from vineyard to marketing:

- intercompany courses provided by ICV œnological centers
- tailored training in your company

ICV Group is certified by the Professional Office for Training Organisation Certification (OPQF).

Qualification des Services Intellectuels IsQ OPQF

# ŒNOLOGICAL PRODUCTS

## For quality winemaking and wines that meet your market requirements.

- Advice from our consultants to recommend solutions geared to your product targets.
- Biotechnologies: yeasts, enzymes, bacterias, nutrients, fermentation activators and fungal chitosan.
- Oak alternatives: staves, chips and pieces.

# RESEARCH & DEVELOPMENT

## So that you can benefit from research geared to quality and innovation.

The engineers and technicians at ICV Group draw on the support of specialist laboratories, an experimental winery and a network of partners.

In our different areas of expertise (viticulture, winemaking, packaging and analyses), we conduct:

Caves Partenaires R&D GROUPE ICV

- applied research
- technical assistance to wineries: winemaking validation of equipment or new processes and small-batch winemaking.

# ICV Group: assets for your success !

## • A unique point of view over the world of wine

Since it was created in 1946, ICV Group has been supporting wine growers in their bid to respond to a changing wine market.

Now more than ever, ICV Group's pioneering spirit helps it to anticipate trends and **contribute to the quality and efficiency of wine businesses.**

## • Unrivalled experience on the ground

ICV Group's consultants work with an extremely **wide array of clients:**

- Nearly 300 co-operative wineries and over 1,500 estates and chateaux, trading companies and bottlers.
- Spanning the Mediterranean rim and Rhone Valley, as well as many other wine regions in France and overseas.
- Covering every stage of wine production (vineyard management, winemaking, maturation, packaging and marketing).

## • The ability to anticipate change

In addition to its daily experience out in the field, ICV Group boasts a highly proficient Research & Development structure. Using tools provided by applied research and experimental trials, its R&D teams provide the wine industry with **solutions to overcome the challenges of the future.**

## • Winemaking and much more

Although winemaking is ICV Group's core business, changes in the marketplace and in the expectations of winegrowers have prompted it to provide its clients with **new services:**

- vineyard services, including the use of **new technologies,**
- cutting-edge **packaging expertise,**
- advice and audits on **quality,**
- assistance for wineries on **sustainability.**

## Did you know?

Along with a group of committed companies, ICV Group has developed a benchmark sustainability charter, implementation of which is symbolised by the Vignerons en Développement Durable brand. This is the only scheme tailored to the wine industry which takes a vineyard to glass approach.

GROWERS IN VIGNERONS DEVELOPPEMENT DURABLE SUSTAINABLE DEVELOPMENT

## Did you know?

### Vintage observatory

**ICV Group's experimental winery ferments grapes from early-ripening vineyards from August onwards. By anticipating the specific features of each vintage, your consultant can provide you with winemaking services suited to your needs.**

## Key facts and figures for ICV Group:

# 10 winemaking centres,

*Located in the heart of the wine regions along the Mediterranean rim and Rhone Valley.*

# 150 employees,

*Including 70 engineers and professional winemakers specialising in vines and wines.*

## • Efficient laboratories

To ensure that your analysis results are precise, reliable and quick, ICV Group laboratories are COFRAC certified and fitted with cutting-edge equipment.

A quality management system, regular inter-laboratory inspections and continuous staff training guarantee excellent service.
